Engine oil consumption The oil consumption of the engine can only be assessed after a longer distance has been driven. Initially, consumption may be higher than the stated value. Frequent driving in the high engine speed range results in higher consumption. Engine oil consumption: Max. 1.0 – 1.5 l/1000 km depending on the driving style.	Fuels for petrol engines Unleaded Superplus fuels, at least 98 RON. Also suitable for temporary use: Unleaded premium fuels, at least 95 RON/85 MON. Engine output may be reduced and fuel consumption may increase.	Towing a trailer Towing a trailer is not permitted with the SL 60 AMG.

Technical data

The data have been determined in conformity with EC directives. All the data apply to vehicles fitted with a catalytic converter in the basic version. The data may differ as a result of optional equipment. Information is available from any Mercedes-Benz service station.

Engine

Rated output	280 kW at 5500 rpm
Rated torque	580 Nm at 3750 rpm
Number of cylinders	8
Total displacement	5956 cm ³
Maximum engine speed	6000 rpm

Top speeds

Automatic transmission	
1st gear	71 km/h
2nd gear	121 km/h
3rd gear	189 km/h
4th gear (electronically governed)	250 km/h
Acceleration with shifting through the gears	
0 – 100 km/h	5.6 sec

Fuel consumption

Automatic transmission	
Urban cycle:	16.9 l/100 km
At 90 km/h:	10.1 l/100 km
At 120 km/h:	12.1 l/100 km
Euro-Mix:	13.0 l/100 km

Starting-off capabilities on inclines

Automatic transmission	47 %
------------------------	------

Car dimensions

Length	4470 mm
Width	1812 mm
Height	1295 mm
Wheel base	2515 mm

Car weights

Kerb weight ¹⁾	1800 kg
Permissible gross weight	2190 kg
Permissible front axle load	1040 kg
Permissible rear axle load	1170 kg

¹⁾ Kerb weight according to DIN 70020 for basic version vehicles.
Optional equipment increases the kerb weight and consequently reduces the payload.
